Sub: Report of Activity **Zero Snake Bite Campaign (Snake Awareness programme)**

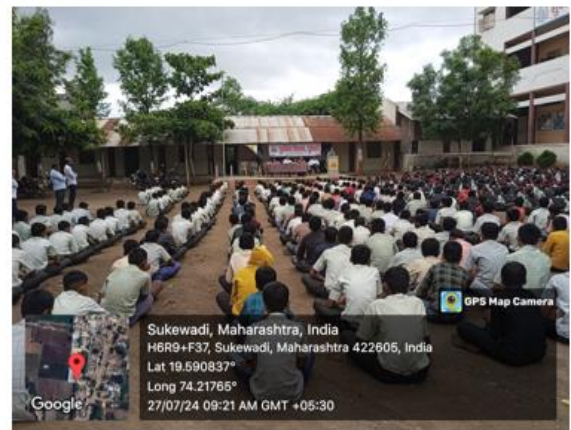

Date :- 27/ 07/2024

Time :- 8.30 AM

Venue :- **Shukleshwar School, Sukewadi**

Sr. No.	Event Activity Description	Description				
1	Introduction	<p>Snakebites, particularly in rural and tropical areas, pose a significant health risk. While some snakes are harmless, others can be deadly, making awareness and education essential. In many regions, students may encounter snakes in their surroundings, so understanding how to stay safe and what to do in case of a snakebite is crucial.</p> <p>This Zero Snakebite Awareness Program aims to educate secondary school students about the importance of snakebite prevention, identification of venomous snakes, and first aid measures. By fostering awareness, students can be empowered to protect themselves and others, minimizing the risk of injury and ensuring prompt and effective treatment when needed.</p> <p>Through this program, we hope to create a safer environment both within school grounds and the wider community by equipping students with the knowledge and skills to respond calmly and effectively to snake encounters.</p>				
2	Aim an Objective	The primary aim of the Snakebite Awareness Program is to educate secondary school students about the risks, prevention, and appropriate responses to snakebites, ensuring they can safeguard themselves and others in their community.				
3	Organizer	SahakarMaharshi Bhausaheb Santuji Thorat Arts, Science & Commerce College-Department of Zoology, Sangamner				
4	Beneficiary	Student	Other College	Teacher / Staff	Stakeholder	Total
		450	0	2	0	452
5	Resource Persons	Dr. L. D. Ghaywat-Head, Department of Zoology, Ms.Pratibha Kurkute-Assistant Professor,Department of Zoology				
6	Topic Covered	1. Introduction to Snakes- 2. Identifying Venomous Snakes- 3. Prevention of Snakebites- 4. What to Do If You Encounter a Snake-				

		5. First Aid for Snakebites- 6. The Importance of Seeking Medical Help- 7. Debunking Myths About Snakebites- 8. Community Engagement and Awareness 9. Emergency Contact Information
7	Outcomes	Outcomes of the Snakebite Awareness Program: 1. Enhanced Knowledge: Students can identify snakes and understand their behaviour, reducing unnecessary fear. 2. Improved Prevention: Practical safety measures will help prevent snake encounters. 3. First Aid Skills: Students will know how to provide proper first aid for snakebites. 4. Reduced Panic: Misconceptions are cleared, fostering calm responses during snake encounters. 5. Community Awareness: Students will spread knowledge, promoting safety in the community. 6. Medical Awareness: Understanding the need for prompt medical help in snakebite cases. 7. Confidence Outdoors: Students will feel safer during outdoor activities. 8. Lower Incidents: Fewer snakebites due to preventive practices. 9. Safer Schools: Improved school safety policies for handling snake encounters.
8	Acknowledgement	We sincerely thank the Shukleshwar school, Sukewadi and administration for their support in organizing the Zero Snakebite Programme. Special thanks to teachers and staff for their efforts in co-ordinating the event.
9	Short report of the activity- The Zero Snakebite Awareness Program aimed to educate secondary school students on snakebite risks, prevention, identification of venomous snakes, and first aid measures. The goal was to empower students to safeguard themselves and their communities. Key Topics Covered: <ol style="list-style-type: none"> 1. Introduction to snakes and identification of venomous species, tips for preventing snakebites. 2. First aid techniques for snakebites. 3. Debunking common myths about snakes. 4. Encouraging community awareness and engagement. 5. Providing emergency contact information. Outcomes: <ul style="list-style-type: none"> • Students gained knowledge to identify and understand snake behavior. • Improved prevention strategies were taught, reducing snakebite risks. • First aid skills were enhanced among participants. • Myths were dispelled, reducing panic in potential encounters. • Students were encouraged to share knowledge, raising community awareness. • Increased understanding of the need for immediate medical care after a bite. • Greater confidence during outdoor activities. • Potential for fewer snakebite incidents. • Enhanced safety protocols in schools for handling snake encounters.
