## **Out Comes of Remedial Teaching**

The primary objective of remedial teaching is to identify learning gaps and the specific areas where a student is having difficulty. This includes analyzing which fundamental concepts are not fully understood and need to be retraced.

By improving student performance, boosting confidence and self-esteem, and preparing students for college and the workforce, remedial classes can have a lasting impact on a student's life. These programs can make a significant difference in a student's academic journey and help them reach their full potential.

Remedial teaching has a function to help students to be able to achieve the expected learning outcomes. Remedial Teaching is teaching a repeat of previous teaching primarily on material that has not been mastered.

The Remedial Teaching economics at the UG & PG stage are making students understand some basic economic concepts and developing economic reasoning and thus learners can apply to their daily life as citizens, workers and consumers; enable learners to realize their role in country building and sensitize them to students.

**Class: S.Y.B.A & T.Y.B.A.**

**Report on Remedial Teaching Methodology**

Remedial teaching is the education imparted to students who are not able to achieve the expected teaching level due to some reason. In this, the study ability of the students is diagnosed with the help of clinical tests, their raw links, their educational level, etc. Remedial teaching is needed to ensure effective learning and improve the quality of education. In this, the teacher empowers students by reducing their weaknesses, knowing their causes and giving them appropriate remedial teaching through their art.

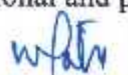

This is why in the academic year 2022-23, S.Y.B.A. and T.Y.B.A. For remedial teaching of the students of this class, instructions were first given to take the children's examination. After deciding the date of the exam, the students' paper was taken on that date. An examination of 20 marks was conducted for each class. In this, the students who got less than 45 percent marks were formed into slow learner group and they were re-taught on the parts they did not understand. Also students who got more than 25 percent marks were taught Advance. Time table and subject points were prepared for that teaching. Taking their hours according to the schedule, they were given lectures in the afternoon. In this way Remedial Teaching was completed using various teaching methods.

• **Teaching Methodology:** The above teaching method was carefully selected. It used simple language, use of fun, encouraging teaching style. Creative teaching was considered. In regular teaching, the above aspects appeared to a lesser extent.

• **Educational Materials:** Educational materials were used more in this teaching. LCD projector, PPT, internet, maps and historical films were used in teaching because they are more useful for explaining abstract concepts. We see the use of educational materials in the current situation even in regular teaching.

• **Outcomes of Remedial Teaching**

1. The students' initial errors in writing were corrected and their ingrained misconceptions were removed.
2. Their confidence increased. Difficulties in studies were removed.
3. In what areas exactly are students lagging behind? What skills have they not developed? Realized this and tried for it.
4. It was realized which educational experiences should be given to the students and which experiences need more emphasis.
5. Individualized guidance enables students to make better efforts to increase their intelligence.
6. By directing the mistakes of the students, solutions could be suggested so that they do not repeat them in the future and this could eliminate the knowledge gap between the students.
7. Not only cognitive but also emotional and practical development of the students.
